#### **Preparation of the product**

Catramina is ready to use, from dilute possibly with a normal synthetic diluent to facilitate its application.

#### **Application**

Mix The product Before of use. Can to be applied to roller or brush.

### Data technicians

PARAMETER	VALUE
Typology	single component
I wait	liquid
Color	black
Mass Volumetric UNI 8310	1.12 gr/cmS
Dilution	0-15% in function of the need (with diluent synthetic)
Pot life UNI EN ISO 9514	1 H
T° Of drying superficialUNI 8904	1 H
Consumption medium	200 gr/m2 on surfaces smooth
Temperature min. Of application	Not inferior to 5°C
Resistence	resists to the water and some acids and alkali to bas-yes very much concentration

### Packages

Kg. 5 – 10 – 20

## Warnings

---

Yes recommends the use of gloves.

In case Of contact with The eyes wash abundantly with waterfall. Not disperse the residues in the environment.

Not apply to temperatures inferior to 5°C.

## Specifications

---

Protection And painting Of structures in wood And in iron, with paint bituminous to quick drying type CATRAMINA-Naici- previous cleaning from the surface.

## Service

**NAICI, in addition to its sales offices, offers its customers a TEAM OF SPECIALIZED PERSONNEL for technical assistance and any application of the product.**

This sheet is based on our best knowledge of the product. Since we cannot exercise any control over the application of the same and there are multiple variations of use, NAICI assumes no responsibility for the use of the product. Always do reference at the last one version updated from the form technique, available on the site [www.naici.it](http://www.naici.it)
